

## **Hadley<sup>®</sup> Universal Height Control Valve Kit**

### **International Part #HAD450CE**

The Hadley<sup>®</sup> Universal Height Control Valve kit, IP #HAD450CE, is a kit for trucks or trailers. The kit includes two (2) brackets:

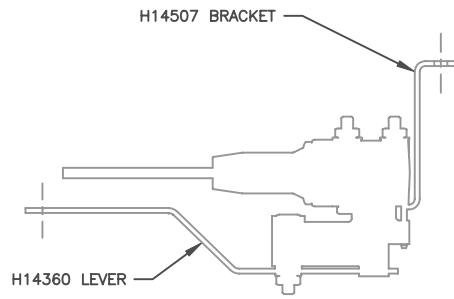

A.) Short leg offset

(Use the short leg offset bracket when replacing a Neway<sup>®</sup> or Delco<sup>®</sup> valve.)

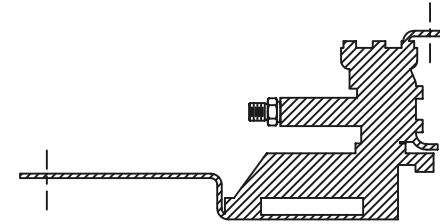

B.) Long leg offset

The correct bracket for the application will properly align the valve lever with the linkage arm. The linkage should be straight and vertical when bolted to the valve lever (see back page).
